

## Clark Forklift Parts

Clark Forklift Part - At this time, there are at least 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive makes of forklifts, with parts covering more than 120,000 specialized components for all of its automated equipment. Your regional Clark Dealer is your total source for availability of all your parts requirements provided by Clark Totalift.

Clark's extraordinary Parts Distribution Stores are conveniently located in Louisville, Kentucky, which serves both their customers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Clark Totalift has a really outstanding global support network. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the material handling industry.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a customary feature on every lift truck.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental limitations, thus placing them in a prevailing market position.

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this technique is extremely economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient ways for production facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing costs. The contemporary value engineering agenda combines progressive product improvement and offers improved customer support and service within the industry.
