

Forklift Electrical Part

Forklift Electrical Parts - Forklifts may be particularly labeled for use in unsafe locations. A labeled forklift denotes the design has met the minimum requirements of ANSI/UL 558 utilized for engine powered trucks or ANSI/UL 583 meant for electric forklifts for the type of label placed.

Applications for marked trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance carrier and Fire Marshall for additional info regarding the permitted uses of industrial powered trucks in your application.

If the particular lift truck meets the outlined criteria, labels could be put. A labeled forklift would show the type of designation placed on the nameplate and will have a properly corresponding label placed.
