

## Barrel Clamps

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic accessory is utilized on forklifts so as to clutch objects which you want to transport using the lift truck. Normally, they're utilized in order to barrels, handle kegs, and paper rolls, along with some barrel clamp designs being able to rotate the load. Like for instance, the revolving function allows the one operating the forklift to be able to insert a vertically stored paper inside the horizontal intake of a printing press.
